Introduction

Dear Customer,

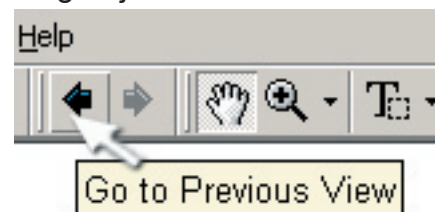

This is a catalogue of spare parts for the CT2K/CTSW ultra light airplane. We would really appreciate your co-operation if you find any kind of discrepancies or mistakes.

Our intention is the catalogue to contain comprehensive information on parts and units that the aircraft consists of and you would probably like to replace.

We plan over the time the catalogue to be available in two forms – CD and Internet.

The catalogue is simple to use. The standard approach of tree structures has been utilized.

On the top of the tree structure you can see the general view of the whole aircraft with arrows pointing to a certain system or unit and naming them. Clicking on a name you come to the more detailed next level picture (or pictures) outlining the system or unit and their options if applicable. The same principle is used on each level of the catalogue from the bottom to the top. On the very bottom of the catalogue you can find single details. On each level of catalogue the information about exact identification number (article) and prices is available, regardless whether this is a single part or a unit or system. To get back to the previous level of the catalogue just click on the button **“GO TO PREVIOUS VIEW”** located on the **VIEW HISTORY** bar of Acrobat® Reader®.

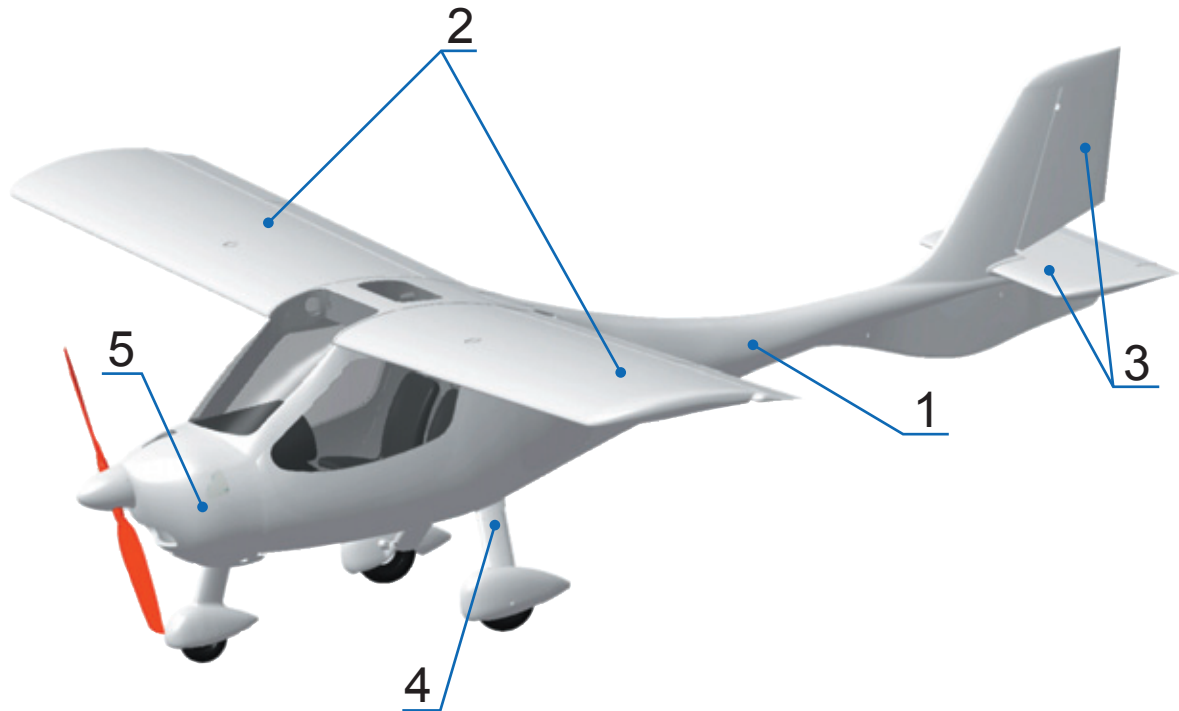

Blue links are for Detailed View,
Red links are for view part price.

You could also get to a certain page clicking on an item in the Table of Content.

We hope, our catalogue will give you complete information about parts & assembly units.

All your questions and suggestions please forward to: **info@esua.com.ua**.
